Sources: EMSI 2018.4 – QCEW Employees, Non-QCEW Employees, and Self-Employed. Excludes military and unclassified occupations.

Notes: LQs compare local employment in an occupation or industry with US employment; LQs >1.25 suggest a comparative advantage and are highlighted (orange font). Detailed occupation tables include occupations with at least 25 jobs. Potential workforce is calculated as the difference between the number of resident workers in the county and the number of jobs in the county for the occupation.

| Professional, Scientific, & Technical Services   | 301            | 565                  | -264         |

Sources: US Census Bureau, LEHD Origin-Destination Employment Statistics.

Note: Arrows are for illustration purposes only and do not indicate direction of commuter flow. In commuter flows, "work in county" refers to workers that are employed in the county and work in the industry, "employed in industry" refers to county residents who work in the industry inside or outside of the county, and "net job flow" is the difference.
